RIDE ON!

Our passion: Supporting the most discriminating wheelchair users

We're honored to have worked with over 200 Paralympians in our Aspen Seating Clinic.

Ride Designs was created to take the design strategies and technologies already proven in the clinic and apply them to more widely available products so that not everyone has to make a special trip to see us for their seating... although we still believe a sight-seeing trip to Colorado should be on everyone's bucket list!

We are a group of clinicians and seating experts who have built a business, not a

corporation that suddenly decided to make money manufacturing seating. We believe wheelchair users, near and far, benefit from that distinction.

Wheelchair yoga changes perceptions

An inspiring story, filmed in an amazing space… worth watching!

Just right... the Java Back

The Java Back meets or beats the weight of other back supports in its category… plus, the Java Back blows the competition away in fit and performance, the most important criteria of all.

The highly-adjustable Java Back enables precise positioning for optimal stability and comes in three heights and two depths depending on the level of support desired. Recently updated hardware is now simpler, lighter and more compact. Learn more about the Java Back here.
