

# Introducing JAVA: the simplest, fully-adjustable back support

# JAVA™

**How do you  
like yours?**

- Skinny**
- Tall**
- Double  
comfort**
- Grande  
support**
- Caffeinated  
performance**

# JAVA

Install and fit — in less time than it takes to drink your half-caff-double-tall-nonfat-extra-foamy latte!

## Biomechanically designed

to independently adjust pelvic support and trunk balance. Optimize either without affecting the other.

## Available in two heights and a range of widths.

Visit [www.ridedesigns.com](http://www.ridedesigns.com) for a full list of sizes, order form, and complete specifications.

## Personalize the contour

with lateral pelvic supports and the new Flexa-just™ gluteal support. Contact so intimate, you can relax with your favorite decaffeinated beverage, without sliding out of your wheelchair.

## Accessorize

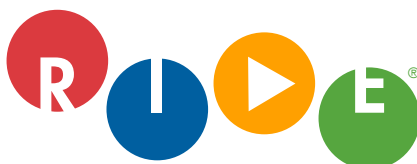

with lateral trunk supports.

## Suggested pairings:

Ride Designs' baristas highly recommend pairing the Java Back with the Ride Forward™ and Custom Cushions.

▶ NOTE: For more complex postural issues, please consider the **Ride Custom Back**.
