Ride Designs®
Java® Back Supports

The simplest, most accurate, and fully adjustable line of back supports.

Now available in:
• Regular
• Tall
• Grande
• Standard & Deep Contours
Biomechanically Designed
Java’s patented design provides the flexibility to accurately fit the trunk and pelvis for superior support, comfort, and mobility.

People are not flat. Java recognizes that.

Other back supports are flat from top to bottom making accurate fit virtually impossible.

Java’s patented design provides the flexibility to accurately fit the trunk and pelvis for superior support, comfort, and mobility.

How we do it...

Install and fit — in less time than it takes to drink your half-caff-double-tall-nonfat-extra-foamy latte!

1. Place pivot at PSIS. No loss of pelvic support with back angle adjustment.

2. Personalize contour at pelvis and buttocks with included accessories.

3. Balance support and freedom of movement. The Grande shell supports the spine, while the cover and foam cushion insert cradles the scapulae in tilt, but is flexible enough to help improve arm function, even hooking (right), when upright.
THREE heights and TWO depths available in each size...

- Regular: Below Scapulae
- Tall: Mid Scapulae
- Grande: Top of Shoulder

3" deep 6" deep 3" deep 6" deep 3" deep 6" deep

Accessorize with:
- Lateral trunk supports*
- Head supports
- Shoulder harness
- Privacy flap*

The hardware advantage

The Java Back Support's highly adjustable, quick release, dynamic hardware makes for a quick fit and easy daily use.

20° of back angle 2" seat depth

Quick release (a)
Dynamic movement (b)

+/− 1" back width

*Available through Ride Designs.
Java Back Supports Specifications

General Specifications
Weight capacity: 300 lbs.
Limited Warranty: Two years
Insert material: ¾” polyurethane over ¼” closed cell foams
Cover material: Polyester spacer fabric laminated to vapor permeable urethane
Shell material: Aluminum
