RIDE ON!

Click here to watch a quick introduction to the new Java Back hardware.

Java Back: now simpler and safer

Latest news: The Java Back has been successfully crash tested and meets the performance criteria for WC20 and ISO 16480-4. More info on the Java Back is here.

Only in Colorado! The outdoor photos included in the overview video were taken at Roxborough State Park, located about 15 minutes from our offices. Can you pick out our surprise guests, who seemed to arrive as if on cue (much to our delight)? This amazing park is worth a trip when you visit us next, perhaps to attend a training course. See opportunities below...

Custom molded seating: appropriate for growing and developing children

"Not only is custom molded seating an appropriate intervention in pediatrics, it is frequently the key intervention that provides a seated environment which promotes optimal physiological, psychological and functional benefits."

Available for download here, *NRRTS Directions* has published an article by May Claire Hetzel, PT that supports the use of custom seating for pediatric clients. Included are a series of compelling photos that demonstrate how Ride Designs custom seating has aided and supported Spencer, shown here, from toddler to young adulthood.

Google maps app now more wheelchair-friendly

The popular map app can now tell you whether locations are suitable for people with access needs – thanks to a group of Googlers who worked on the feature in their "20% time." Read more about the development of this new feature here.

Ride University: Upcoming courses for clinicians and suppliers

2017 Ride Custom Certification Courses

Course dates for 2017 are: March 23-24, May 4-5, and June 1-2. Enjoy learning about wheelchair seating in our new Denver-area training facilities and gain hands-on experience with the Ride Custom products. (And perhaps tack on a few days of skiing or vacation?!) More information here.

Standard Seating Measurement: A Practicum

In this hands-on workshop, participants learn how to take linear and angular measurements of a seated person's body and their seating support surfaces. The course is scheduled for May 3, 2017 so it may be taken alone or in conjunction with the May 4-5 Custom Certification Course. Details here.

We wish you a healthy, happy & prosperous holiday!

On behalf of our customers, friends and referral sources, we've made a contribution to a local charity.

— Your friends at Aspen Seating and Ride Designs

Our offices and clinic will be closed December 23, December 26 and January 2
