Ride Custom AccuSoft

Covers cut-away to show layers/options

Custom contoured soft foam

Incontinent-proof inner cover

Breathable outer cover

spacer fabric x-section

Ride Custom Cushions aid in improved postural control, mobility and skin care. The new Custom AccuSoft Cushion is no exception.

While our belief in the benefits of firm support is unwavering, we recognize that there are times when a softer cushion material may be what's needed for a more forgiving sitting surface.

Cover options

Just like the firmer Ride Custom 2 Cushion, breathable spacer fabric material promotes airflow to help keep the sitter dry and comfortable.

The AccuSoft cushion comes with an inner incontinent-proof liner.

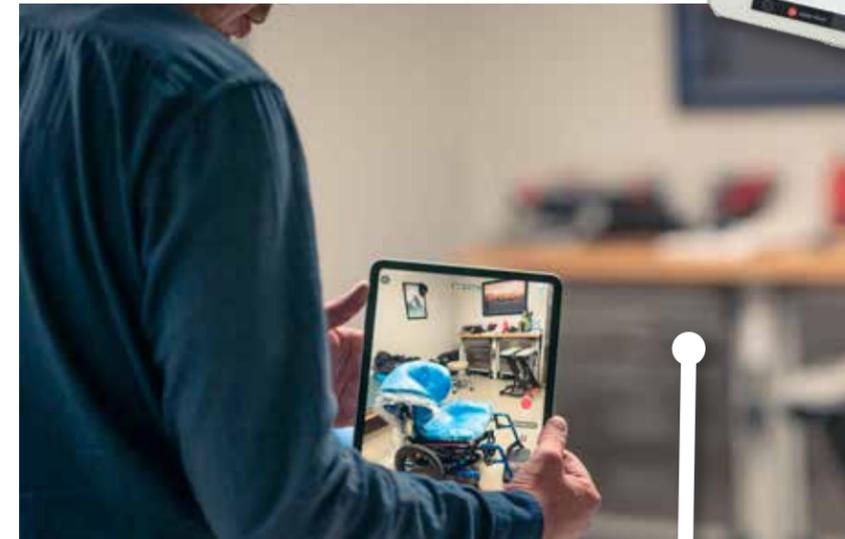

For ease of care, an optional wipeable outer incontinent-proof cover is also available.

Modifiable

All cover options allow access to the cushion for in-field modifications.

Extra Support

Optional reinforced lateral thigh supports boost structural integrity while using forgiving materials that help reduce the risk of injury to skin and soft tissue

Quick & Easy: Simulation, Scanning, and Ordering Process

Fast and accurate simulation

Ride Custom Cushion and Back simulation is completed with a dual bead-bag and vacuum system. The patent-pending Shape Capture Base, coupled with the seat bead-bag, helps to stabilize the pelvis while the bead bag is malleable, and enhances shape accuracy. It also creates the necessary reference for the seat contour orientation. No need for laser levels, putty or roping.

Simple and safe

Capture shapes, draw trim-lines directly on the bead bags, scan the shape and then let the RideWorks app guide you through the rest. A fresh outer simulator bag for each simulation helps prevent cross-contamination and infection.

RideWorks

Ride's exclusive app organizes the process of client photos, scanning, and order form completion — all of which are then transmitted to Ride Designs via the internet with secure encryption.

Ride Custom AccuSoft Cushion

Use with Confidence

The Ride Custom AccuSoft Cushion comes with a 90 day fit and function guarantee and a 24 month limited warranty.

The Cushion has a maximum client weight of 250 pounds for cushions 20" wide or narrower; 300 pounds for 21" or wider.

Custom Cushion Comparison*

| | Custom 2 | Custom AccuSoft | Competitor |
|--------------------------|--------------------|-----------------|--------------------|
| Softness | .. | | |
| Stability | | ... | ... |
| Skin protection | | ... | . |
| Heat/moisture management | | ... | . |
| Adjustability | | .. | none |
| In-field modifications | | ... | none |
| Weight | (lightest) | | (heaviest) |

*The Ride Custom AccuSoft Cushion is not a fully off-loading cushion. For the ultimate in skin care, stability, and performance, consider the Ride Custom 2 Cushion.

Make it a System!

Pair a Ride Custom Back with the Ride Custom AccuSoft Cushion for unparalleled sitting performance.

The Ride Custom Back

Lightweight strength and accuracy Thin profile has little or no impact on wheelchair seat depth, width, or performance, making the Custom Back appropriate even for active users.

Adjusts easily The infinitely adjustable FlexLoc® mounting system allows adjustment in every axis of movement, ensuring optimal balance and postural control.

Breathable The ultra-breathable 3D mesh liner, plus spacer fabric cover, help to keep the sitter dry and comfortable in virtually any climate.

Forgiving An optional soft, open-cell polyurethane foam insert is available as an alternative to the firm, breathable composite or 3D mesh liners.

Easy to clean Removable and washable cover eases cleaning and maintenance.

Growable The Back can be grown at a fraction of the cost of a new custom system.
