

Springtime in Colorado: National Disabled Veterans Winter Sports Clinic

This annual event in Snowmass, Colorado provides a fantastic way for veterans with disabilities to explore many different adaptive sports and activities. It's also a great opportunity for veterans to come together, relax and enjoy the company of friends while making new memories.

There is a focus on education -- learning about sports, good positioning and seating. Meanwhile, volunteers become more knowledgeable about working with veterans in both everyday seating and sports interfacing.

Wow! 2018 marked Joe Bieganek's 15th year volunteering at the Winter Sports Clinic.

To find out why the event is so amazing, watch this awesome [video](#) -- or read an [interview](#) with Joe (orthotist / Ride Designs president) on our blog.

RideWorks Resources: Beyond the app

If you're working with our custom products, the RideWorks app walks you through the process.

But if you'd like to review and refresh your knowledge on the latest in accurate custom scanning, the [RideWorks web page](#) has a wealth of information, along with links to videos and pro scanning tips.

For example... Did you know? Scanning with RideWorks can be done with the iPad held horizontally -- in the landscape position or...wait for it... vertically -- in the portrait position!

That's right! If a shape is tall, it is helpful to hold the iPad vertically when scanning to capture the top of the shape. If the shape is wide, the horizontal method works best.

Where did the new accessible icon come from anyway?

How a street art project inadvertently prompted a reimagining of the symbol... learn more [here](#).

We're collecting interesting variations of the symbol, old and new... so if you see an interesting variation or situation, take a pic, [send it to us](#), and we might just feature it on our [Instagram](#) feed. (BTW if you're not following us there, you should!)

New Forward Cushion Sizes

We've added four sizes to the Forward Cushion: 14 x 18", 15 x 15", 15 x 17", and 17 x 17". The new sizes are now standard and immediately available. More information on the Forward Cushion is available [here](#).

Ride Custom Certification Course

For clinicians and suppliers

Learn about wheelchair seating in our Denver-area training facilities and gain hands-on experience with RideWorks and the Ride Custom products.

Course dates are May 3-4 (full) , July 26-27, and October 18-19.
