

Ride's concise product range has truly got you covered! Ride cushions and backs are designed to help protect skin—plus, provide the stability to improve posture and mobility.

Consider this: Competitive products that protect skin through immersion and envelopment are inherently unstable. Posture is sacrificed for skin protection.

Ride products are designed to help manage skin and posture, along with heat and moisture. Download the newly updated [Ride: The Range brochure](#), a quick-start guide to the options.

Applications open for first ever SCI Artist - Innovator grants

"The spinal cord injury (SCI) community is abundant with out-of-the-box thinkers, hackers, problem solvers, and individuals creatively tackling challenges. Center for Cultural Innovation (CCI) offers artists, innovators, inventors, makers, and entrepreneurs financial capital for social-impact oriented, creative entrepreneurship projects." Learn all about the program and application process [here](#).

"April hath put a spirit of youth in everything."

Fun Finds / Resources

- Words matter: Major League Baseball has recently responded to calls to change the outdated "Disabled List" terminology to the "Injured List." Learn why [here](#).

- A career path to consider? Kudos to "[Nurses on Wheels](#)"... a great article from New Mobility magazine.

- US Senator Tammy Duckworth has pushed through a regulation forcing airlines to file a report when they mishandle (damage or lose) motorized wheelchairs and scooters. Learn more about the new data indicating the scale of the problem [here](#).

Thanks for reading,
Your friends at Ride Designs

P.S. If you somehow missed the last newsletter... the most-viewed story was about the debut of a new softer custom cushion option, the Ride [Custom AccuSoft Cushion](#).
