New Product Development Specialist

Position Summary

Working with our product specialists, engineers, sales and marketing teams, the candidate will be responsible for designing, developing and improving our line of seating and positioning products, as well as sustaining engineering activities for existing products, manufacturing processes and documentation. The ideal candidate would have a background in 3D CAD / CAM design and development, and experience with common manufacturing techniques and design; machining, plastic injection, sheet metal, foams, etc.

Desired Experience & Qualifications:

- 5+ years new product design & development experience
- B.S.M.E or similar degree desired but not required based upon relevant experience.
- 3D CAD / CAM Software experience: Designing custom components, generating machining toolpaths and preparing files for multi-axis CNC machining using software such as SolidWorks and Autodesk HSM
- Ability to generate new and unique processes and multi-axis CNC toolpaths for custom product fabrication
- Willingness to research and embrace new technology
- Quick learner and comprehension of new software and processes
- Good research and problem-solving skills to help determine and define directions to proceed with manufacturing and assembly methods
- Ability to execute several projects at once with limited supervision
- Project management and organization; creating & tracking project schedules, identifying goals and milestones, keeping management team up to date with progress updates
- Strong analytical and problem-solving skills
- Proficient in Microsoft Word, Excel, Project, and PowerPoint
- Work with suppliers to ensure components and assemblies meet design requirements & diagnose design problems
- High degree of initiative and self-motivation
- Experience in product design and development in a R&D environment
- Collaborative brainstorming and development experience for new product ideas and improvements
- Strong written and verbal communication skills
- Ability to identify areas of innovation for products as well as manufacturing processes

Salary commensurate with background and skill set. Background check & drug screen required. Aspen Seating/Ride Designs is an equal opportunity employer.
