How to use a Java[®] Cushion to evaluate Custom AccuSoft Cushion specifications

Step 1

Sit client on an appropriately-sized Java Cushion. Size used: Width _____" Length _____"

Step 2

Determine targeted cushion width in 1" increments. □ Record targeted width in section 3 of the cushion order form.

Step 3

Determine targeted cushion length relative to the front of the Java Evaluator Cushion. Measure from the front of the Java Cushion to establish cushion length. Record targeted cushion length is section 4 of the cushion order form.

Step 4

Determine if additional lateral pelvic control is needed, adding Ride CAM Wedges to achieve this. Indicate where, and how many, Wedges were used. The Ride Custom AccuSoft Cushion will be carved to match the contour created by Ride CAM Wedge placement. No Wedges used Wedges used on left side 0 01 02 Wedges used on right side 0 01 02

Step 5

Determine targeted sitting height and record in section 5 of the cushion order form. Note: the height of the Java Cushion base and foam topper is as low as the Custom AccuSoft Cushion can be made.

Step 6

Determine whether wedges are needed under the Java Cushion during evaluation to achieve the desired position for correction or accommodation of pelvic/femoral asymmetries.

Record the usage of wedges here and record the targeted height in all four corners. Lateral height can be increased up to 2" from the top of the Java Evaluator Cushion.

Note: If more than 2" of additional lateral height is needed, please utilize Ride shape capture tools to capture and scan the shape.

Wedges used:

□ Front □ Back □ Left Side □ Right Side

Cushion height at corners:

Front Right ______ Front Left ______ Rear Right ______ Rear Left ______"

Step 7

Determine if additional medial and/or lateral thigh support is necessary in section 7 of the cushion order form.

Lateral height can be increased by up to 2" from the top of the Java Cushion, in 1" increments. Note: If more than 2" of additional lateral height is needed, please utilize Ride shape capture tools to capture and scan the shape.

Step 8

Complete the remainder of the order form and email, along with photos of the client in the Java Evaluator Cushion, to: customerservice@ridedesigns.com.

Proceed to Page 5 if a scanned shape is being submitted.

Photos and Scan

Using RideWorks? Use RideWorks app to:

- Photograph front and both sides of client during shape capture.
- Photograph captured shape.
- Scan captured shape.
- Take any and all additional photos that may help.

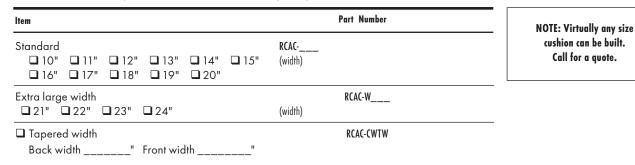

Not using RideWorks? Include:

- Photograph of front and side view of client during shape capture or evaluation in Java Cushion.
- Photograph of captured shape or of Java Cushion once evaluation is complete.

The Ride Custom AccuSoft Bundled Package includes all of the following options

_____"Wx_____"Dx_____"H

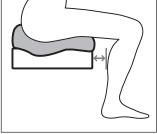

Cushion Width (Actual cushion width will be 1/2" less than specified.)

Cushion Length

(IMPORTANT: Specify cushion length relative to front of Shape Capture Base or Java Evaluator Cushion as shown.) Measure from front of Shape Capture Base or Java Evaluator Cushion to establish cushion length. Note: Cushion must not exceed wheelchair dimensions by more than 1" in any direction.

ltem	Part Number	
Equal to Shape Capture Base length	RCAC-CLAC

Boosts structural integrity while using forgiving materials that help reduce the risk of injury to skin and soft tissue. (Includes right and left sides.)

For targeted cushion height: at the projected cushion length, measure from the bottom of the shape capture base or Java Evaluator Cushion up to the underside of the leg with the feet properly positioned on the footplate(s).

Determine targeted front of cushion height (front view).

1	
and the second se	
The Lateral Thigh Support	

The Lateral Thigh Support Reinforcement option removes ½" of cushion foam from each lateral thigh support. Reinforcement material replaces the foam that was removed, without increasing the overall width of the cushion.

* All prices are in U.S. dollars.

** If these modifications were not selected with the included cushion cover, they will be provided at no charge with the additional cushion cover.

Special Instructions or Comments

NOTE: May affect price; call to request quote.

Pair the Ride Custom AccuSoft Cushion with a Ride Custom Back Support for optimal seating

Consider Ride Designs' lightweight, thin-profile, and adjustable Custom Back support for the widest range of seating needs.

Breathable

Ultra-breathable 3D mesh liner material, along with a spacer fabric cover, help keep the sitter dry and comfortable in virtually any climate.

Forgiving

An optional soft, open-cell polyurethane foam insert is available as an alternative to the ultra-breathable 3D mesh liner.

Protection and comfort

Supplementary padding and reliefs improve protection and comfort at sensitive areas.

Easy to clean and adjust

Removable and washable cover eases cleaning, maintenance, and adjustments.

Mounting options

Strong outer shell provides stability and surfaces for easy mounting of hardware and accessories.

Growable

Like the Ride Custom AccuSoft Cushion, the Back can be grown at a fraction of the cost of a new custom system.

More information at www.ridedesigns.com
