## ► Shape capture method

### Using RideWorks® app?

Before scanning, on the clear, outer shape capture bag (using a black permanent marker), draw trim lines and marks to draw the back as it should be manufactured, including:

- Arrow pointing upward, indicating top of back
- Soft relief areas to protect bony prominences
- Depth and height of the lateral trunk supports\*\*

### Using plaster instead of RideWorks app?

Before shipping cast, allow to DRY for 48 hours, and complete the following:

- Order form (enclose one copy in box with cast)

Mark cast with following information:

- Trim lines
- Arrow pointing upward indicating top of back
- Vertical line at approximate midline of wheelchair. Note: This may differ from client midline in the presence of severe postural asymmetry.
- Client first name and last initial (name should exactly match name on order form face sheet)
- Date
- Supplier/Vendor
- Supplier/Vendor representative name
- Therapist name

NOTE: Do not ship cast in a plastic bag.

If plaster is sent to Ride Designs, a RideWorks scanning fee of \$290.00\* will apply.

## ► Before transferring client from shape capture bag, please complete the following...

**PHOTOS** of client in shape capture bag:  Front view  Side view

- Included in RideWorks® client files
- Emailed to customerservice@ridedesigns.com, with client name and provider information
- Attached

Trim lines; establish and mark on clear, outer shape capture bag:

- Back height
- Lateral support depth and height\*\*
- Iliac crest height

\* All prices are in U.S. dollars.

\*\* External stainless steel reinforced lateral supports (RCB-RLTS, \$428.00) are required if laterals are over 6" deep.
