

May your holiday celebrations be joyous! Our offices will be closed on Friday, December 24; Monday, December 27 and Friday, December 31.

Ride Custom 2 Cushion modification videos

Ride now has a playlist of ten video shorts, each demonstrating how to accomplish a specific Custom Cushion modification.

Among the videos:

- [Shortening the cushion](#)
- [Lowering the front of the cushion by wedging](#)
- [Undercutting the cushion for tight hamstrings](#)
- [Modifying the well under the ischial tuberosities](#)

Find the whole series, [here](#).

Free webinar: Christian Bagg on the flow of innovation in adaptive design

A 2022 keynote webinar sponsored by [NRRTS](#) will feature Christian Bagg, a Calgary born inventor and mechanical designer, on

Thursday, January 6 at 7pm ET. Register in advance [here](#). CEUs available.

Injured in 1996 while snowboarding, Christian was paralyzed from the waist down. Using his background as a machinist, he began to invent his way around the challenges he faced. With a love for the outdoors and a passion for problem solving, he has spent the last 20 years designing and building adaptive equipment. Christian will speak about his process: from concept, research, customer engagement, to development, then repeat.

Potential career highlight of 2022?

Learn with us in Colorado...

"Excellent course. Changed the way I will approach seating."

Registration is open for all 2022 Custom Certification Courses. The two-day course will provide you with the best information available on custom seating — content ranges from dynamic lecture sessions to hands-on workshop sessions.

Dates are:

January 20-21 (already full)

March 17-18

April 21-22

June 23-24

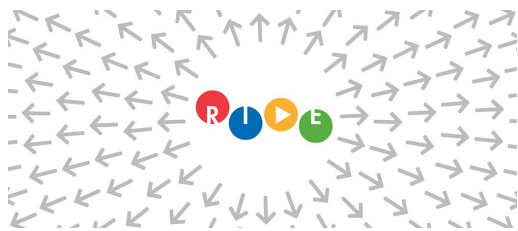

July 21-22

October 20-21

October 27-28

Also check out the Hand Skills course that can be combined with the Custom Certification Course... highly recommended. Get additional information and register [here](#).
