Ride On!

New seating study
Seated buttocks anatomy and its impact on biomechanical risk

New research features the largest body of MRI data ever collected from real people, with actual disabilities and varying history/risk for sitting related pressure injuries. Quite interesting... learn more about the study by Sharon Sonenblum, PhD., here.

Java Cushion: "Game Changer"

Wheelchair user Michael Franz includes the Ride Java Cushion in "Identifying the Game Changers So You Don't Have To," -- a column about products that have positively affected his health and well-being in New Mobility magazine. Learn more about how the Java Cushion works here.

Soft focus for ISS

We're excited to demonstrate just how awesome the soft Ride Custom AccuSoft Cushion is, as well as the new soft foam insert option for the Ride Custom Back. Look for us in booth 1!

Also, don't miss: "**Seated Anatomy and its Impact on Pressure Ulcer Risk** (D2)," presented by Sharon Sonenblum, Ph.D., and exploring the relationships between anatomy, tissue shape, skeletal morphology and pressure ulcer risk.

Join us: Ride Custom Certification Courses

Plan to attend this game-changing course and become certified to work with Ride Custom Cushions and Backs... learn all about the course and why you really should come to Colorado to take it, here!

Remaining 2020 course dates: April 23-24, July 30-31, October 22-23, October 29-30. Basic info and registration here.

In case you missed it...

The most read story in the last newsletter was about a letter, from a wheelchair user who'd tried nearly everything over the last 45 years, here.

```
"...they have given me
    my life back."
```

Changes!

We're completing a major upgrade to our order processing system.

Quotes, Order Confirmations, Packing Slips and Invoices have a new look. Find out more about the changes here.
