

First-person seating stories

"...they have given me my life back."

We've posted a particularly compelling letter, from a wheelchair user who'd tried nearly everything over the last 45 years, [here](#).

We hope you're seeing equally exciting results in the field. Here's to the life-changing power of assistive rehab technology, appropriately applied!

Working together, better

With a goal of fostering a better collaborative working experience with you, we are completing a major upgrade to our order processing system.

Quotes, Order Confirmations, Packing Slips and Invoices have a new look. Read about the changes [here](#).

Meet us in Vancouver

International Seating Symposium: March 3-6

We're excited to demonstrate just how awesome the [Ride Custom AccuSoft Cushion](#) is, as well as the new [soft foam insert option for the Ride Custom Back](#). Look for us in booth 1! (Conference details are [here](#).)

Don't miss this:

Seated Anatomy and its Impact on Pressure Ulcer Risk (D2)

Presented by Sharon Sonenblum, Ph.D.

This workshop will present the seated anatomy of more than 40 individuals of varying levels of biomechanical risk and the relationships between anatomy, tissue shape, skeletal morphology and pressure ulcer risk. It will also explore clinical measurements that may help to predict differences in biomechanical risk across individuals.

2020 Ride Custom Certification Courses

Plan to attend this game-changing course and become certified to work with Ride Custom Cushions and Backs... learn all about the course and why you should come to

Colorado to take it, [here!](#)
