

## New online CEU course!

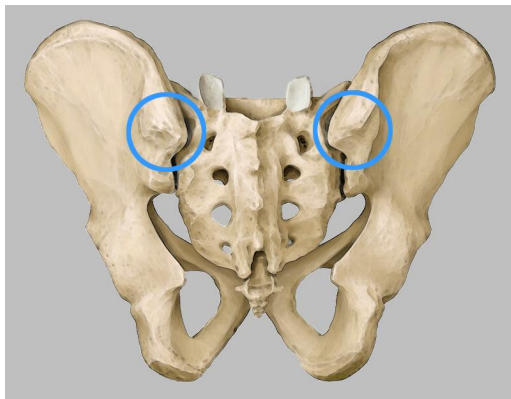

[Searching for Good Outcomes in Industry Sponsored Research](#) is Ride University's latest free CEU course offering.

Taught by Sharon Sonenblum, PhD, Biomechanical Researcher at Georgia Tech University, the course provides information on the different types of studies

being done, how to evaluate the research processes, and how you might use the results in clinical decision-making.

**Learn more** about wheelchair seating and Ride products, from experts in the field, and at your own convenience, on Ride University's [online education platform](#).

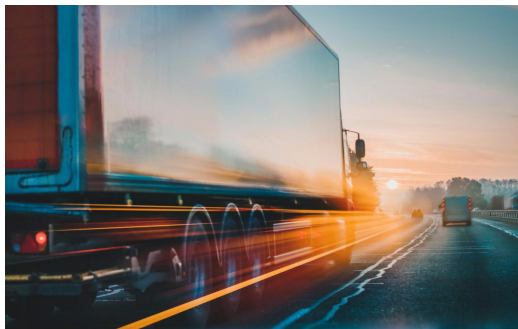

## Psst... locate the PSIS for optimal Java Back fit

When determining the correct height of the Java Back on a wheelchair, it's important to locate the client's PSIS (Posterior Superior Iliac Spine).

The PSIS, circled here, is the most prominent posterior aspect of the iliac

crest, often seen as a dimple in the skin. Learn more about how to locate the PSIS [here](#).

## Working fast to ship your wheelchair seating orders

We're happy to report that 98% of Ride Custom Cushions and Backs currently ship within 12 business days of receipt of completed order. The Java Cushion and

Back and Forward Cushion ship within two business days.

## Upcoming custom certification courses

Courses are scheduled at Ride headquarters near Denver on August 12-13, and September 30 - October 1.

Learn more and register [here](#).

Attendance at courses is limited to allow for social distancing. We keep a waitlist for courses that may be full, but become available as social distancing

recommendations change.
