

New CEU / Learning Opportunities

Visit our new online learning platform to learn about wheelchair seating and Ride products at your own convenience -- and get CEU credit for some of the offerings. The first class, "Custom Seating Strategy: Early versus Late Intervention," is now available, with more to follow soon!

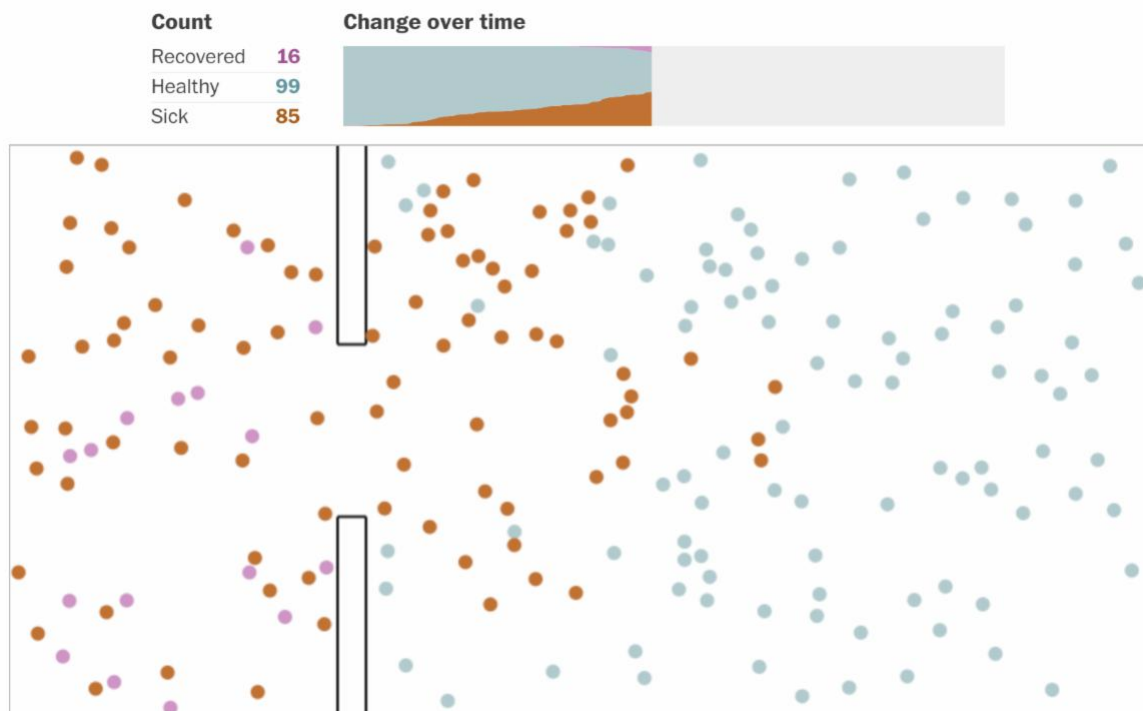

Take a look [here](#).

Navigating COVID-19

While all the closures and cancellations are daunting, it's truly an act of solidarity: attempting to "flatten the curve" and give nurses, doctors, and hospitals a fighting chance.

Learn more about how social distancing may affect infection rates by [watching these amazing animations](#) from the Washington Post.

Detailed information on our COVID-19 procedures are posted [here](#). Like you, we're doing everything we can think of to help -- and at this time, our supply chain remains robust and we are currently operating at full capacity.

We aim to help: poster for those at high risk

Most of us are concerned about those in our lives who, for whatever reason, may be at high risk for COVID-19.

We've designed a simple cautionary poster (8.5 x 11") that you can print out, distribute, and post on doors/windows as appropriate.

Download the pdf print file [here](#). Feel free to share widely.

 **Someone at this location is at high risk.**

People at high risk are more likely to catch COVID-19 and more likely to have life-threatening complications if they become ill.

We are self-isolating and/or practicing social distancing as a preventative measure.

IF YOU FEEL AT ALL UNWELL or we don't answer the door, please leave deliveries.

Thank you!

ISS soft focus

It was great to see many of you in Vancouver and be able to demonstrate just how awesome the soft Ride Custom AccuSoft Cushion is, as well as show off the new soft foam insert option for the Ride Custom Back.

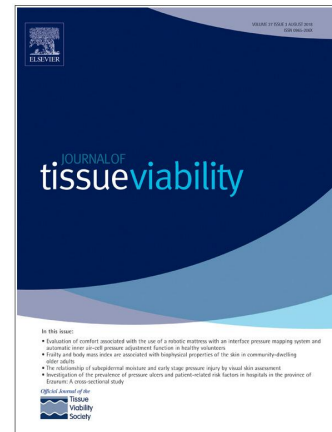

If you missed it and aren't up to speed on these new soft options, learn more here:

- [Ride Custom AccuSoft Cushion](#)
- [Ride Custom Back](#)

In case you missed it...

The **most read story** in the last newsletter covered new research that features the largest body of MRI data ever collected from real people, with actual disabilities and varying history/risk for sitting related pressure injuries. Quite interesting... learn more about the study by Sharon Sonenblum, PhD., [here](#).

Notice anything different?

We're completing a major upgrade to our order processing system. Quotes, Order Confirmations, Packing Slips and Invoices have a new look. Find out more about the changes [here](#).

Thank you for reading!
