Although the International Seating Symposium is delayed (where we would typically bring many of you up to date on the latest Ride news), we have lots to share... and look forward to spending time in person in the not-so-distant future!

---

## NEW: AccuSoft Cushion lateral reinforcement option

The Ride Custom AccuSoft Cushion is a great option for those needing a softer, more supple sitting surface.

If additional rigidity is needed to support the lateral thighs, a new reinforcement option boosts structural integrity, while using forgiving materials that help reduce the risk of injury to skin and soft tissue.

Quick link to [video tutorial](#).

---

## More evidence

The [Forward](#) and [Java Cushions](#) were the subject of recent clinical trials, to evaluate their efficacy, in support of Ride's entry into the German market.

Ride Designs provided test products but no further support. Clinical trials measured specific outcomes and demonstrated high-level skin protection qualities. The results support the peer-reviewed research previously conducted at several different institutions in the United States.

## Made for each other: Kids, Custom Seating and 24-7 Posture Care Management

Ride University now offers a [free new course](#) offering .2 CEUs. Learn how to integrate fundamental principles of 24 hour posture care management. Implementing strategies beginning at a young age can aid in reducing secondary complications and provide more optimal outcomes.

Presenter Tamara Kittelson-Aldred, Occupational Therapist, Assistive Technology Professional/Seating and Mobility Specialist has specialized in 24-7 Posture Care Management for the last few decades and has seen first-hand how this approach can improve quality of life.

A great resource, learn lots more about wheelchair seating and Ride products, at your own convenience, on Ride University's [online education platform](#).

## Ultra-breathable liner for the Ride Custom Back

This new liner option, made from 3D mesh, performs as well as the original composite liner — yet it's even more breathable. While allowing increased air flow, the ultra-breathable liner retains less moisture than the original, making it easier to wash and quicker to dry. In-field modifications are a breeze. There is no additional charge associated with selecting this liner option. Learn more [here](#).

## And the Oscar goes to...

The "[Crip Camp](#)" documentary won the Audience Award at the Sundance Film Festival and is now nominated for an Academy Award. If you haven't seen it yet, check it out!

"No one at Camp Jened could've imagined that those summers in the woods together would be the beginnings of a revolution. Just down the road from Woodstock, Camp Jened was a camp for disabled teens. Directors Nicole Newnham and Jim LeBrecht (a

former camper himself) deliver a rousing film about a group of campers turned activists who shaped the future of the disability-rights movement and changed accessibility legislation for everyone."
