## Making a difference one client at a time

Our products would not be effective without your efforts and expertise in the field on our behalf. Thanks for helping change lives for the better, like this:

**"I'm writing to tell you that the Ride Designs Custom 2 Cushion has been working like a dream.** I haven't had so much as a small red spot since I've been using it. I ended going to the wound clinic back in September when I received the cushion... haven't had a reason to go back since. I don't spend nearly as much time laying around in bed. I'm able to stay up late in my cushion without as much risk. The only thing I had to get used to was the cushion is thicker than any of my previous cushions so the chair needed some adjustments. This cushion has seriously improved my life and given me freedom that I had been missing for that year in which I was treating my pressure wound."

— Kevin Schaefer

## Rave reviews on AccuSoft

The Ride [Custom AccuSoft Cushion](#) is designed for those needing a softer, more supple sitting surface. Reports from the field indicate that ATPs are finding it a great solution for clients who benefit from an accurate shape, and because of the forgiving surface, the cushion functions well even in living situations when they may not always be positioned as precisely.

Get up to speed on AccuSoft and consider how it might work for some of your clients:

## Continuous improvement

Have you heard? In alignment with our mission to use

only the very best materials to make Ride cushions and back supports, Ride will discontinue Brock composite foam for the Ride Custom Back in just a few days, at the end of the month.

The new ultra-breathable 3D mesh liner option for the Ride Custom Back has received rave reviews in the field. It keeps the sitter even cooler and drier, is easier to clean, and in-field modifications are much more efficient.

More detailed information -- plus answers to most-asked questions on the discontinuation are [here](#).

## Compelling research from Germany

The [Forward](#) and [Java Cushions](#) were the subject of recent clinical trials, to evaluate their efficacy, in support of Ride's entry into the German market. Learn about the results [here](#).

## Ready to travel? Attend a Custom Certification course in Colorado

Registration is open for courses scheduled June 10-11 and July 22-23 [here](#). Attendance at courses is limited to allow for social distancing. We do keep a waitlist for courses that may be full, or become available as social distancing recommendations change. All possible safety precautions (per CDC and Colorado Health Department recommendations) are being taken.

---

## Price change for Ride Custom products

Effective July 1, all Ride Custom products will incur a slight price increase. Updated order forms will be available July 1. Pricing on quotes provided prior to July 1, 2021 will be honored. Contact Shelly Young, product manager at 866.781.1633 x 312 with any questions.
