

All of us at Ride are very grateful for your business, loyalty, and friendship. Here's to the beginning of a wonderful holiday season!

Our offices will be closed for the Thanksgiving holiday on Thursday and Friday, November 25-26. Gobble, gobble...

While 98% of Ride Custom seating products are currently shipping within 12 business days of receipt of complete order, shipping times as the holidays approach are expected to slow. Anything you can do to get orders finalized and into the pipeline as soon as possible will be helpful. (Standard products usually ship within two business days but shipping delays remain a concern.)

Ongoing advocacy for Complex Rehab Technology

Traditionally, each fall Complex Rehab Technology (CRT) advocates fly in to Washington, D.C., to educate congressional lawmakers on CRT-related issues. This year, delegations from each state met with healthcare liaisons in a virtual format to discuss their biggest concerns. [Learn more about the issues and the process here.](#)

On the horizon: International Seating Symposium

It's been quite a long while since our industry has gathered in person... We look forward to seeing many of you at ISS in Pittsburgh January 31 to February 2, 2022. If you're not able to attend, Ride will also have an online booth presence; more on that to come.

Ticket to Ride in 2022!

"Learn more in three minutes with this course than one day with other vendors/manufacturers."

Registration is now open for all 2022 Custom Certification Courses. The two-day course will provide you with the best information available on custom seating — course content ranges from dynamic lecture sessions to hands on workshop sessions.

Dates are:

January 20-21 (already full)

March 17-18

April 21-22

June 23-24

July 21-22

October 20-21

October 27-28

Also check out the Hand Skills course that can be combined with the Custom Certification Course... highly recommended. Get additional information and register [here](#).
