

Corbac Back Support to be discontinued

We are sorry to announce that due to increased manufacturing costs and decreased reimbursement, Ride will discontinue manufacturing and sale of the Corbac Back Support, effective January 1, 2019. We are sorry to see it go... the Corbac, beloved by many, offers moderate support with precision-adjustable tension in a lightweight, minimal design.

Orders placed by the end of business on December 31, 2018 will be fulfilled. Limited Warranty for this product will remain effective for 24 months from the date of delivery to the original purchaser. Please contact Ride Designs Customer Service with any questions.

Advocacy is important

Fun Finds / Resources

- Singer/songwriter and violinist Gaelynn Lea has released a new album, "Learning How to Stay" that includes, "I Wait," and connects her music with her work in the disability rights movement. "It is my plea for our country to step up and take action to make our society more accessible," Lea told the country music website, The Boot. "We've waited long enough." Sample her music below and read more [here](#).

- Great to see promising advances in spinal cord injury featured in the mainstream media. Here's an [article](#) from NBC Nightly News, with accompanying video, about how a new device is helping patients to walk again.
- This design idea could be a great help to wheelchair riders and many others... maps that would also show the ups and downs of elevation. See an example [here](#).

P.S. If you somehow missed the last newsletter... the most-read story was about the Java Back's varying levels of support. The Ride Java Back is designed to fit nearly everyone, with the exception of those who require a Custom Back. Available heights are grande (top of shoulder), tall (mid-scapulae), and regular (below scapulae) -- all in depths of either three or six inches. A well-fitting back truly works in tandem with a cushion, to help relieve pressure and increase stability. Learn more about the Java Back [here](#).
